[Completed] Server Maintenance - April 30th

2022-04-28 - Devin S - Announcements

While connecting to our **Singapore** server location on April 30th, you may run into connection issues or a decrease in speed while connected. In between the hours of 5:00pm and 1:00am MST the next day, we will be performing maintenance on the Singapore server location that will result in only allowing limited capacity. We advise users to use a different server during this time period.

As always, if you have questions or concerns, feel free to reach out to us & a support agent would be more than happy to assist! We apologize for the inconvenience this may cause, but we appreciate your patience as we address this matter.
