Request for VPN Server in Malaysia Deployed

- R Raymond

Hi all,

I've been subscripted to PIA for over a year and at mean time I'm still connect to the nearest VPN Server located in Singapore and actually it does effect some of my website like Microsoft News my Browsers, YouTube and also my Downloads and all my 2FA which prompt wrongly that I'm connecting via Singapore. Even my Microsoft Email and billing all in Singapore Dollar instate of Malaysian Ringgit. I would really appreciate if PIA could setup a VPN Server in Malaysia for Malaysian users.
