

Geo-Located Servers We Offer

Kaneesha D. - 2022-08-17 - Servers

As of June of 2020, Private Internet Access began rolling out geo-located servers across 35 different locations/regions. In the server view, when these servers are enabled, you will see an icon that resembles a globe, noting that each of these servers is not physically located in the region where the exit node is located.

The implementation of geo-located servers has provided us an opportunity to offer VPN services in countries where service may not have been previously available due to restrictions, government legislation, or a lack of secure server providers. The following servers are currently or in the process of being geo-located:

- USA, Alabama
- USA, Alaska
- Algiers, Algeria
- Andorra, Andorra
- Buenos Aires, Argentina
- USA, Arkansas
- Yerevan, Armenia
- Nassau, Bahamas
