## How do I create a shortcut for the app on my desktop (Win/Mac)?

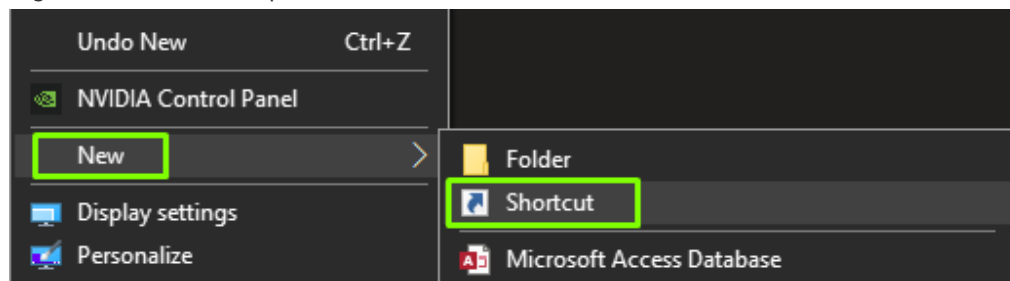

Kaneesha Davis - 2022-04-11 - Application & Features

The installer for our app does not automatically create a shortcut, and you must do so manually.

Windows:

To create the shortcut in Windows:

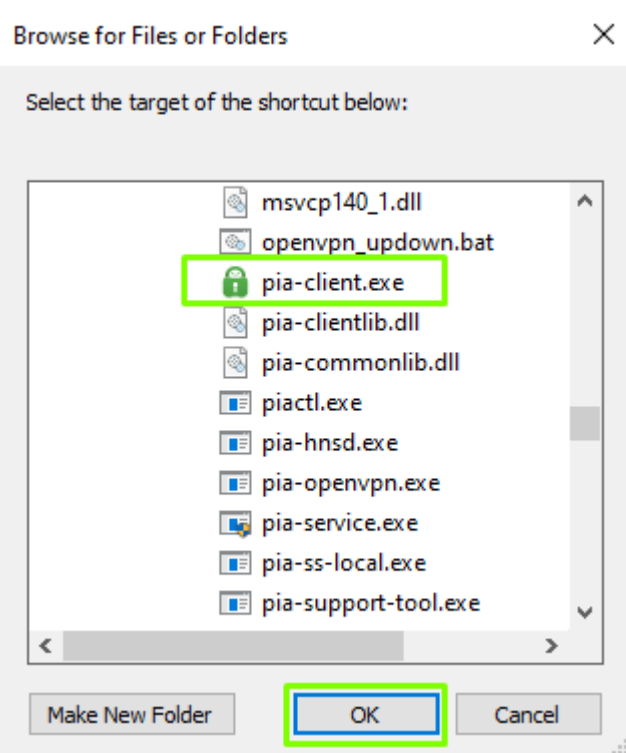

1. Right Click the Desktop and click New > Shortcut

2. Click the Browse button next to the search bar

3. When the Browse for Files or Folders menu appears, click This PC > Windows (C): > Program Files (NOT Program Files (x86)) > Private Internet Access > pia-client.exe

4. Then click OK

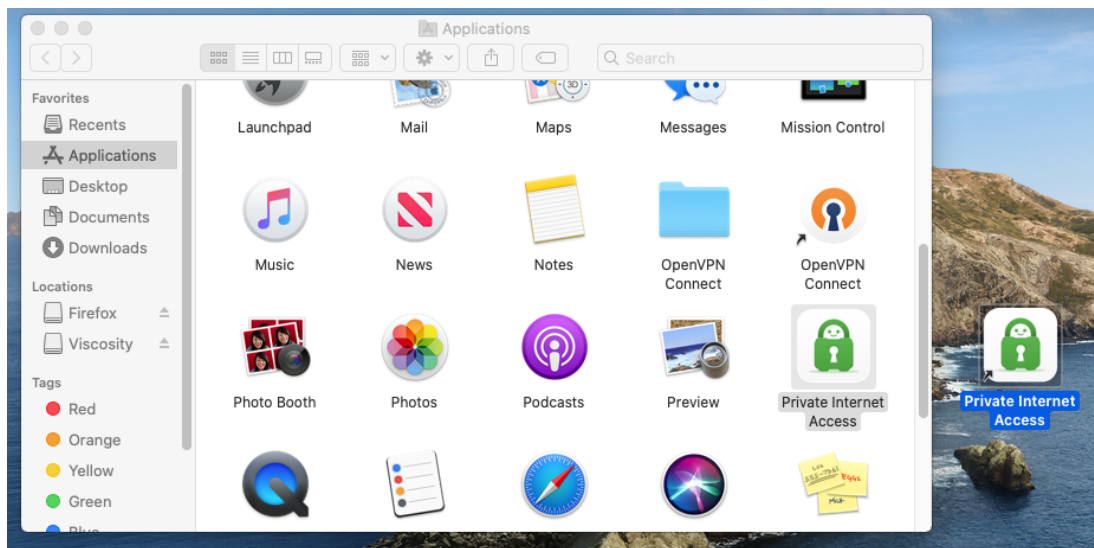

5. Then Next and finally Finish

Mac:

To create the shortcut in Mac:

Simply drag the PIA VPN App icon from the Application folder onto the desktop and run it from there.
