Beta Operating System Functionality

2021-06-07 - Devin S - Announcements

Although we would like to ensure privacy for all users and their systems, we are unable to guarantee functionality of the PIA application on beta versions of operating systems or Windows Insider builds. Unfortunately, many variables are in play when using an unofficial release of an operating system which may cause a conflict with the VPN client.

While the ability to use the VPN client when using a prerelease version of an operating system may be available, we are limited in the support we can provide, resulting in us being unable to guarantee functionality.

If you have any questions or need any assistance configuring your PIA client, please reach out to us through our [Helpdesk](#) where our CS Team would be more than happy to assist!
