[COMPLETED] Server Maintenance - April 5th

2022-04-04 - Devin S - Announcements

Our Sydney Australia server location will be undergoing maintenance as of April 5th 9:00pm MST, which will last until 1:00am MST on April 6th. With the duration of maintenance being 4 hours, you may run into issues connecting while server upgrades are being implemented. We advise users to use a different server location while maintenance is being performed.

At any time, if you have questions or concerns, feel free to reach out to us & a [support agent](#) would be more than happy to assist! We apologize for the inconvenience this may cause, but we appreciate your patience as we address this matter.
