## [COMPLETED] Server Maintenance - January 17th

2022-01-17 - Devin S - Announcements

Around 10:00 AM MST today, we will be performing maintenance on our New York Server location. During this time, you may run into issues attempting to connect to this location, as well as decreased speeds while connected.

As this may interfere with your experience using our application, we urge users to use a nearby server location as a temporary alternative while we address the maintenance that is needed. We apologize for the inconvenience this may cause and we look forward to having this location operational for you in the near future. At any time, feel free to reach out to our [support team](#) for any questions or concerns.
