Desktop Client - 3.1.2 Release

2021-11-24 - Devin S - Announcements

Desktop client v3.1.2 is now available! In this release, we've fixed an issue on Windows where the client would crash upon enabling the Split Tunneling feature. You should now be able to successfully use the Split Tunneling feature while using Windows as your Operating System.

At any time, if issues persist or if you have any questions, please feel free to contact us through our 24/7 [Live Chat support](#) or through a support ticket using our [Helpdesk!](#)
