Mobile Application - 3.15.0 Release

2022-03-21 - Devin S - Announcements

We are proud to introduce 3.15.0 of our Mobile Application! With hard work from our Mobile Development Team, we've been able to address various bugs, as well as implement an In-App Survey that will allow users to provide us with feedback from within the Mobile Application.

At any time, if you have questions regarding our service or if you run into issues while using the Mobile application, one of our support agents would be more than happy to assist you. You can get in touch with us through our [24/7 Live Chat Support](#) or through our [Ticketing System](#).
