Mobile Application - 3.16.1 Release

2022-05-03 - Devin S - Announcements

Our developers have provided us with an update to our iOS application, 3.16.1! Included in this new release is a fix for iOS where some users would be stuck in a state where they successfully logged into the application, but would not be unauthorized access, while simultaneously not being kicked out of the application. This issue, being related to expired login tokens, has been addressed.

As always, if you run into any issues installing the update or using our service, our Support Team would be more than happy to assist with addressing your needs! Whether through our 24/7 [Live Chat Support](#) or our [Ticketing system](#), we want to ensure anonymity for all users seeking it!
