Mobile Application - 3.18.0 Release

2022-08-10 - Devin S - Announcements

We have officially released version 3.18.0 of our iOS Application! In this release we've been able to address bugs within the application, as well as improve our debug log feature, which will help our agents identify issues in a more swift manner.

If you have questions regarding our service or if you run into issues while using our Mobile application, our agents are here to support you! You can get in touch with us at any time using our [24/7 Live Chat Support](#) or through our [Ticketing System](#). Thanks so much for your continued patience and support!
