Purchasing a subscription from inside Russia

2022-03-31 - Devin S - Announcements

While striving to make internet privacy an option for everyone, we've now released a payment option for people located in Russia who seek the use of our services. In addition to using **Crypto Currencies**, you can now select the **Qivi** option to take advantage of the deals on our website and create a subscription with us.

At any time, if you run into issues setting up our service or if you have any questions regarding your account with us, please feel free to get in touch with one of our [support agents](#) and we will be more than happy to assist you!
