[Resolved] Server Outage - May 19th

2022-05-19 - Devin S - Announcements

At this time, our **London Streaming Optimized** server location is unavailable. We are currently experiencing issues within our data center causing the server option to no longer be listed. While our team is working to address this matter, we advise users to use an alternative Streaming Optimized server for the time being. We apologize for the inconvenience this may cause and hope to have this location available soon. We appreciate your patience.
