Streaming ITV Now Available!

2022-06-22 - Devin S - Announcements

We are excited to announce that the free-to-air television network, ITV is now available when connected to the VPN client! When using the UK Streaming Optimized server location, you will now have full range to stream ITV from anywhere in the world!

While ITV still has the ability to combat our solutions, our team is dedicated to keeping this as an available option for all PIA users. If you run into any issues accessing ITV, please grab the VPN IP address that was in use and inform our support team of this inability to connect using our [Helpdesk](#).

To find all the streaming services that PIA supports, you can reference our [Streaming With PIA](#) support article where the server location is listed in conjunction with the services supported by the location.

Feel free to reach out to us if you have any questions, or suggestions on streaming services you would like to have supported in the future!
