Updates to the Great Firewall of China

2022-10-07 - Devin S - Announcements

Recently, we have begun to see reports of users being unable to access VPN services from within China. This is the result of a recent upgrade to the Great Firewall in a deliberate attempt to block all VPN services and protocols. Our team is investigating options for workarounds for this issue, but we do not currently have a timeframe for circumventing this block. We apologize for any inconvenience this may cause and we appreciate your patience.
